Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Owned **full-stack** AI products end to end: **React/TypeScript** frontends and **Node.js**/Python backends, shipped through **GitHub Actions CI/CD** and handling millions of daily transactions.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Secured web services with **OAuth** and **RBAC** behind typed **REST/JSON APIs**, with an S3-backed store at **sub-200ms p99**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Built an **SRE incident agent** that escalates to a SQL agent over **A2A**, plus a **JIRA** Q&A agent, with **Langfuse** tracing and Claude-based tool calling in production.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

LangFetch `tinyurl.com/LangFetch`

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Java, JavaScript, TypeScript, Python, SQL

Web & APIs: React, Node.js, REST APIs, OAuth 2.0, RBAC, FastAPI, Spring Boot, PostgreSQL

AI Apps & Agents: AI Agents, Tool Integration, Grounding (RAG), Evals, Monitoring, Responsible AI, Azure, OpenAI, Claude

DevOps: Azure, AWS, GCP, Docker, Kubernetes, CI/CD, Observability, AI-Assisted Development (Claude Code, Codex, Copilot)

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
