Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Build backend services and REST APIs (Python, TypeScript) with unit and integration tests integrated into CI/CD pipelines, following Agile sprint practices.
- Collaborate with cross-functional teams to implement new features, troubleshoot technical issues, and support the full software development lifecycle from design through deployment.
- Built an automated testing and evaluation framework catching regressions before production release, applying secure coding and code review standards.
- Participate in sprint planning, reviews, and retrospectives, using Git-based version control for all code changes.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built data processing jobs (PySpark) for large-scale dataset preparation, documenting pipeline changes and testing activities.
- Built evaluators tracking regressions across versions, catching issues before they reached production.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Developed and maintained 25+ production C++ and SQL-backed services for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Wrote and executed unit and integration tests to verify functionality, documenting technical solutions for team knowledge sharing.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Participated in Agile ceremonies (daily stand-ups, sprint planning, retrospectives) and mentored junior engineers through code reviews.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Evaluation platform with automated regression testing and alerting across versions; Python/FastAPI backend, PostgreSQL, Git-based version control.

LangFetch | tinyurl.com/LangFetch

- Full-stack application with TypeScript/Node.js backend, React frontend, and PostgreSQL, decomposing user queries into SQL subqueries via a typed REST API.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Application diagnosing production incidents by routing alerts through automated troubleshooting logic and synthesizing evidence-backed reports.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, C++

Testing & Version Control: Unit Testing, Integration Testing, Git, Code Review, CI/CD

Methodology: Agile, Scrum, Sprint Planning, Retrospectives

Data & Cloud: Relational Databases (PostgreSQL, SQL), AWS, Docker

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
