EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned features **end-to-end**, from design through deployment, shipping **React/TypeScript** frontends wired to **Python/Node.js** backends with **GitHub Actions CI/CD**.
- Engineered a **distributed executor** routing pipeline nodes to **Docker** containers and **serverless functions** via typed **REST APIs**, backed by an **S3** artifact store at **sub-200ms p99 latency**.
- Implemented **OAuth-based auth** and **RBAC** for secure **service-oriented** access; participated in **design reviews** and **code reviews**, providing feedback to peers.
- Deployed **AWS** serverless infrastructure (**Lambda, S3, DynamoDB, API Gateway**) supporting real-time services at scale.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by rebuilding a synchronous service into an **async, autoscaled** architecture on **GCP Cloud Run**.
- Triaged and resolved **distributed system incidents** end-to-end on an **on-call rotation**, driving operational improvements with automated **CI/CD rollback** and **failure alerting**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production microservices** for **1M+ users** at **99.9% uptime** over 4 years on **AWS (EC2, RDS, SQS)**, owning **system design** and **reliability**.
- Led **architecture and code-review sessions** across production services, mentoring engineers and onboarding them to team systems and processes.
- Standardized **REST API** failure-handling contracts across **service-oriented** systems, cutting production escalations **60%** in one quarter via **root cause analysis**.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Built a full-stack **observability** platform with a **React** dashboard, **FastAPI** collector, and **PostgreSQL**, tracing requests, latency, and cost end-to-end.

LangFetch

tinyurl.com/LangFetch

- Built a full-stack **agentic SQL workspace** with a **Next.js** frontend and **FastAPI** backend that plans and executes multi-step queries.

VPC Control Plane Simulator

github.com/ganeshhgupta/vpc-control-plane-sim

- Built a full-stack **Next.js** application simulating AWS-style **VPC networking**, with **CIDR validation**, routing, security-group evaluation, and a **PostgreSQL** backend.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, JavaScript, Java, Go, SQL, C++

Frontend: React, Next.js, HTML, CSS

Backend: Node.js, FastAPI, REST APIs, Service-Oriented Architecture, Microservices

Cloud & DevOps: AWS (Lambda, S3, DynamoDB, API Gateway, EC2, RDS, SQS), GCP, Docker, CI/CD

Engineering: Design Reviews, Code Review, On-Call, Mentoring, Fundamentals (DS&A, OS, Networks)
