Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Led delivery of production **agentic AI** workflows on **LangGraph**, **OpenAI Agents SDK**, **CrewAI**, and **AutoGen**, with **MCP tool-calling** and a **Pinecone** RAG layer at **99%+ uptime**.
- Owned a deployment-gated **evaluation framework** with guardrails and regression testing that blocks failed agent releases before production, setting quality and **incident-readiness** standards.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC** for secure access.
- Drove use of **AI-assisted development** (**Claude Code**, **Codex**) across coding, review, and troubleshooting, validating AI output with peer review and automated tests.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Designed a **Neo4j** knowledge graph for graph-aware retrieval in a regulated healthcare product, and served LLMs on **vLLM** and **TensorRT-LLM**.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in financial services at **99.9% uptime** over 4 years on **AWS**.
- Cut production escalations **60%** in one quarter by standardizing retry, timeout, and failure-propagation contracts, driving **root cause analysis**.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

LangFetch `tinyurl.com/LangFetch`

- **LangGraph** agent that plans multi-step SQL with intermediate state, served via **FastAPI** and exposed as an **MCP** server.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and synthesizes root-cause reports.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- Self-hosted **LLM evaluation** platform with **hallucination detection**, regression alerting, a **FastAPI** backend, and **PostgreSQL**.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Java, SQL, TypeScript

Agentic AI in Production: OpenAI Agents SDK, LangGraph, MCP, Tool Calling, Guardrails, LLM Evaluation

MLOps and Platforms: Deployment Gating, Langfuse, vLLM, PyTorch, Airflow, CI/CD

Secure Distributed Systems: Spring Boot, Kafka, SQS, Redis, AWS, Kubernetes, OAuth, RBAC

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
