Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Wrote systems-level code in **Go**, **Rust**, and **C++** for **scheduling**, **resource allocation**, and **fault-tolerant placement** across a shared compute fleet under GPU-scarcity constraints.
- Operated multi-cloud **GPU clusters** (AWS, GCP, CoreWeave) on **Slurm** and **Kubernetes**, keeping **fleet utilization** up through node loss and provider failures for long-running batch training jobs.
- Built observability and autoscaling for **vLLM** inference serving with **Prometheus/Grafana**, and trained and fine-tuned **PyTorch** models on multi-GPU clusters.
- Validated changes in production with **A/B tests**, **staged rollouts**, and deployment-gated **regression suites**, rolling back on measured regressions before full release.

QureAI | *ML Infrastructure Engineer* Mar 2026 – Present

- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Built a model **observability** platform tracking drift, latency, and eval regressions, with **automated CI/CD rollback** that cut manual incident toil.
- Built **PySpark** jobs for large-scale dataset preparation feeding model training and **evaluation pipelines** in a regulated **healthcare** product.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **Oracle SQL and PL/SQL** with indexed views and partitioning.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

Distributed KV Store `github.com/ganeshhgupta/distributed-kv-store`

- **Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Go, Python, C++, Rust, Java, SQL

Compute Platform: Slurm, Kubernetes, Batch Scheduling, Resource Allocation, Autoscaling, Docker, Linux

Data & Measurement: PySpark, Airflow, Prometheus/Grafana, Telemetry, p99 Latency Analysis, A/B Testing

Cloud: AWS, GCP, Azure, CoreWeave, NVIDIA GPUs, InfiniBand, vLLM

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
