EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned full-stack product delivery: designed architecture, built **React/TypeScript** frontend and **Node.js/Python** backend, shipped to a **production environment** with **GitHub Actions CI/CD**.
- Built **React/TypeScript** web features with **REST API** backends and a live **SSE** UI across **millions of daily transactions**.
- Maintained production services; joined **code reviews**, Agile ceremonies, and cross-functional technical discussions to ship tested, maintainable solutions.
- Used **Codex** and **Claude Code** as **AI tools** in engineering workflows, while owning implementation and production delivery.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Developed scalable **Python backend services** with **Docker**; participated in an **on-call rotation**, resolving cloud infrastructure incidents end-to-end.
- Designed **BigQuery** schemas and optimized **SQL** for ML feature pipelines through partition pruning and clustering.
- Cut **p99 latency 420ms to 140ms** across **50K+ daily requests** by migrating to async **vLLM** serving on **GCP Cloud Run**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+ production Java microservices** backed by **SQL** for **1M+ users**, sustaining **99.9% uptime** on **AWS** (EC2, RDS, SQS).
- Cut nightly financial aggregation from **8 minutes to 90 seconds** by redesigning **SQL** with indexed views and batch partitioning.
- Standardized **REST API** contracts and failure handling across **25+ services**, reducing production escalations **60%** via consistent retry and timeout semantics.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Built a full-stack app with **React/TypeScript**, **Node.js**, and **PostgreSQL**; a **LangGraph** agent decomposes multi-table questions into dependency-ordered **SQL** subqueries.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Built a full-stack evaluation platform with **FastAPI** backend, **React/TypeScript** dashboard, and **PostgreSQL**; tracks scoring, drift, and latency across model versions.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Built a **LangGraph** multi-agent system to diagnose **production incidents**, route alerts to specialized agents, and synthesize **root cause reports**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML5, CSS

Web & Backend: React, Node.js, FastAPI, Flask, REST APIs, SSE, PostgreSQL, Redis

Delivery & Cloud: GitHub Actions, CI/CD, Docker, AWS, GCP Cloud Run, Agile, on-call

Fundamentals & AI: Data Structures & Algorithms, Database Systems, Claude Code, Codex, LangGraph

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
