EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Architected scalable platform APIs and distributed services handling millions of daily transactions at 99%+ uptime, with design reviews setting the bar for testability and reliability.
- Built a deployment-gated evaluation framework enforcing guardrails and quality checks across agent/model outputs, blocking 15% of failed releases before they reached production.
- Engineered a pluggable distributed executor with an S3 artifact store, applying fault-tolerant design and failure isolation under production scale constraints.
- Used AI tooling directly in the engineering workflow to find issues and drive fixes faster, including in self-built observability and evaluation systems.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built an observability framework tracking drift, latency, and regressions in production, catching failures before they reached customers.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by redesigning synchronous serving into an async, fault-tolerant architecture.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated 25+ production C++ and SQL-backed microservices for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services at scale, reducing production escalations 60% in one quarter.
- Mentored junior engineers on system design and distributed-systems best practices while driving a redesign of nightly data processing from 8 minutes to 90 seconds.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains, routing alerts to specialized sub-agents and synthesizing evidence-backed root cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, and regression alerting across model versions; FastAPI backend, PostgreSQL.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: C++, Java, Python, TypeScript, SQL

System Design: Distributed Systems, Fault Tolerance, Scaling, Failure Isolation, Consensus Protocols

Reliability & Tooling: Observability, Evaluation/Guardrail Frameworks, AI-Assisted Development, CI/CD

Cloud & Data: AWS (EC2, S3, RDS, SQS), GCP, Docker, Kubernetes, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
