EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Deployed and operated production GenAI and agentic workloads on Azure alongside AWS and GCP, using Azure-native services for model hosting and pipeline orchestration.
- Provisioned and managed cloud infrastructure declaratively with Terraform across multi-cloud environments, maintaining reusable modules and environment promotion for Docker/Kubernetes-based deployments.
- Built a multi-agent system via the OpenAI Agents SDK and MCP tool-use, with Python automation and operational tooling supporting production rollouts at 99%+ uptime.
- Maintained multi-stage CI/CD pipelines with automated quality gates and rollback, blocking 15% of failed releases before production, and instrumented services via Prometheus/Grafana for actionable alerting.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Operated multi-cloud GPU infrastructure (AWS, GCP, CoreWeave) with Docker/Kubernetes-based scheduling, writing Python and Go tooling for fault-tolerant placement under capacity constraints.
- Built model observability tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows across model versions.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices with Kafka-based distributed messaging and SQL/NoSQL data infrastructure for 1M+ users at 99.9% uptime on AWS.
- Standardized CI/CD and failure-handling contracts across 25+ services, reducing production escalations 60% via consistent retry, timeout, and rollback patterns.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed storage engine handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling network isolation and subnet routing.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM/agent evaluation and observability platform with drift detection and regression alerting; FastAPI backend, PostgreSQL, Docker-based deployment with CI/CD.

LangFetch

tinyurl.com/LangFetch

- LangGraph agent with MCP-compatible tool-use decomposing natural language into dependency-ordered SQL subqueries; deployed as an API server with Python-based automation tooling.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Go, Java, C++, SQL

Cloud & Infra: Azure, AWS, GCP, Terraform, Docker, Kubernetes, Helm, CI/CD (GitHub Actions)

Agentic AI: LangChain, LangGraph, OpenAI Agents SDK, MCP, Multi-Agent/Tool-Calling Systems, Azure OpenAI

Observability & Data: Prometheus, Grafana, PostgreSQL, Kafka, Distributed Messaging, NoSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
