EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Built **multi-agent** system via **OpenAI Agents SDK** + **MCP** tool-use with **structured outputs**, handling **millions of daily transactions** at **99%+ uptime**.
- Owned frontend-to-backend delivery of AI agent workflows using **React** and **TypeScript**; built a real-time **SSE**-based UI surfacing live agent output to end users.
- Built full-stack platform services using **Node.js**, **TypeScript**, and **NestJS**-backed **REST APIs** on **AWS** with **Docker**, shipped through **GitHub Actions CI/CD**.
- Drove **AI-assisted development** with **Claude Code** and **Codex** across the team, and tuned agentic workflows across **GPT**, **Claude**, **Llama**, and **Gemini** per use case for quality and cost.
- Designed stateful agent recovery via **Redis checkpointing**; interrupted workflows resume from the last committed step across **distributed execution**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built model observability framework tracking **drift**, **latency**, and **eval regressions** in production, enabling governance-aligned rollback workflows.
- Improved **RAG** retrieval recall **61% to 89%** on a **2K-query eval set** by rebuilding chunking with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected **25+** production microservices with **REST APIs** for **1M+ users** at **99.9% uptime** on **AWS** (EC2, RDS, SQS).
- Cut nightly financial aggregation from **8 minutes to 90 seconds** by redesigning **SQL** with indexed views, batch partitioning, and schema changes.
- Standardized failure-handling contracts across **25+ services**, reducing production escalations **60%** in one quarter via consistent retry, timeout, and propagation semantics.
- Managed **Git**-based workflows, **code reviews**, and **CI/CD** delivery with **unit and integration testing** across the team.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent decomposes multi-table questions into dependency-ordered **SQL** subqueries with intermediate result passing; deployable as **MCP**-compatible server.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with rubric-based scoring, **drift detection**, and latency tracking; **FastAPI** backend, **React/TypeScript** dashboard, **PostgreSQL**.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent** system for automated **incident triage** and **root cause analysis**; routes alerts to specialized sub-agents and synthesizes actionable resolution briefs.

EDUCATION

University of Texas at Arlington | *MS Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *BTech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, Go, HTML/CSS

Full Stack: React (hooks, state management), Node.js, NestJS, REST APIs, FastAPI, PostgreSQL, Redis, Kafka

Agentic AI: Claude Code, Codex, MCP, OpenAI Agents SDK, LangGraph, RAG, Evals, Structured Outputs, Prompt Engineering

Cloud & DevOps: AWS (Lambda, S3, EC2, RDS, SQS), Docker, GitHub Actions, CI/CD, Observability, Data Structures and Algorithms

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
