EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed, built, and operated **cloud service** features at **high scale and availability**: a pluggable **distributed executor** routing workloads across **Docker** and **AWS Lambda** with an **S3**-backed artifact store.
- Built **backend microservices** in **Python/FastAPI** and **Java** for multi-agent AI workflows, taking them from prototype to production at **millions of daily transactions** and **99%+ uptime**.
- Debugged and optimized issues **across multiple services and teams** using **Prometheus/Grafana** observability, correlating compute and network telemetry to catch regressions early.
- Shipped a deployment-gated **evaluation** framework with automated regression **testing** in **CI/CD**, blocking **15%** of failed releases before production.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Owned **ML infrastructure** end to end, from model deployment to evaluation and debugging, cutting **p99 latency 420ms to 140ms** across **50K+ daily requests**.
- Built and operated **Kubernetes**-based **GPU** infrastructure across clouds, writing **Go** and **Python** tooling for scheduling and fault-tolerant placement.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Owned **25+ production microservices** end to end for **1M+ users** on **AWS** (EC2, RDS, SQS), sustaining **99.9% availability** over four years in an **agile** team.
- Shipped **Java/Spring** backends and **React/TypeScript/JavaScript** frontend interfaces end to end, from schema design to UI, simplifying administrative workflows for enterprise users.
- Profiled compute and memory bottlenecks** across **C++/Python** services and optimized batching and **concurrency**, raising throughput **2.4x** and cutting memory **27%**.

PROJECTS

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** distributed key-value store with **linearizable reads**, leader election, and **log compaction**.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent** incident-diagnosis system with **tool-use** chains that collects evidence from logs and metrics and synthesizes root-cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, drift detection, and latency tracking across model versions; **FastAPI**, **PostgreSQL**, regression alerting.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript, SQL, Go

Backend & Distributed Systems: Microservices, REST APIs, Distributed Systems, Concurrency, Raft Consensus, High Availability

Frontend: React, TypeScript, JavaScript, HTML, CSS

Cloud & DevOps: AWS, GCP, Kubernetes, Docker, CI/CD, Prometheus, Grafana, PostgreSQL, Redis

Fundamentals: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Debugging

Certifications: AWS Certified Developer Associate, Google Cloud Professional Machine Learning Engineer
