EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned backend services and RESTful APIs end to end, translating business and technical requirements into scalable application designs across a production system handling millions of daily transactions at 99%+ uptime.
- Supported CI/CD pipelines and cloud-native deployment on AWS and GCP, automating build, test, and release workflows across the team.
- Mentored engineers on code review standards, system design, and cloud-native architectural best practices.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by diagnosing and redesigning a synchronous service into an async architecture.
- Partnered with cross-functional teams to translate ambiguous requirements into technical designs, tracking progress against delivery standards.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and led the design and development of 25+ production Java Spring Boot microservices exposing REST APIs for financial transaction processing, serving 1M+ users at 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized REST API contracts and failure-handling across 25+ services, reducing production escalations 60% via consistent retry, timeout, and OAuth-aligned authentication patterns; led architecture decisions and code-review sessions.
- Mentored engineers on system design, reliability, and secure API design, establishing code review standards adopted across the team.
- Wrote JUnit/Mockito test suites and enforced code coverage standards; used Git-based version control and CI/CD (Jenkins, GitHub Actions) across the SDLC.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed storage engine in C++ handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend, PostgreSQL, and automated test suites wired into CI/CD for regression detection before deploy.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains, applying object-oriented design patterns to route alerts to specialized sub-agents.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Python, SQL, C++, TypeScript

Java/Backend: Spring Boot, Spring MVC, REST APIs, Microservices, OOP Design, JUnit, Mockito, OAuth

Cloud & DevOps: AWS (EC2, RDS, SQS, Lambda), GCP, Docker, Kubernetes, Git, Jenkins, GitHub Actions, CI/CD

AI/ML Awareness: LLMs, NLP, Machine Learning, Computer Vision, Agentic AI (production experience at Oracle/QureAI)

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
