EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Engineered cloud-native executor routing pipeline nodes to **Docker** containers and serverless functions via **REST APIs**, implementing **OAuth**-based auth and **RBAC** for secure service access.
- Owned end-to-end AI-powered products: designed architecture, built **React/TypeScript** frontend and **Node.js/Python** backend, shipped to production with **GitHub Actions CI/CD**.
- Engineered pluggable **distributed executor** routing pipeline nodes to **Docker** or **AWS Lambda**, backed by **S3** artifact store eliminating redundant recomputation.
- Designed stateful recovery via per-node **Redis checkpointing**; interrupted workflows **resume from the last committed step** across **distributed execution**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut **p99 inference latency 420ms to 140ms** across **50K+ daily requests** migrating synchronous serving to async **vLLM** on **GCP Cloud Run** with autoscaling.
- Built **model observability** framework tracking **drift**, latency, and **eval regressions** in production, enabling governance-aligned **rollback** workflows.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Standardized **REST API** contracts across **25+ Java services** with consistent retry, timeout, and **OAuth**-aligned auth; reduced cross-service escalations **60%** within one quarter.
- Designed and operated **25+ production Java microservices** processing **financial transactions** for **1M+ users**, maintaining **99.9% uptime** and **zero data loss** on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across **25+ financial services**, reducing production escalations **60%** in one quarter via consistent **retry, timeout, and propagation** semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** KV store with **linearizable reads** and **log compaction**; companion **VPC control plane** simulator modeling subnet routing and security groups.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system diagnosing **production incidents** via tool-use chains; routes alerts to specialized sub-agents and synthesizes **root cause reports**, reducing **MTTR**.

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent decomposes multi-table questions into dependency-ordered **SQL subqueries** with intermediate result passing; deployable as **MCP-compatible** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: TypeScript, JavaScript, Node.js, Python, Java, Go, SQL, HTML/CSS

API Platform: REST API Design, API Contracts, Versioning, Backward Compatibility, Safe Rollouts

Identity: OAuth, RBAC, Authentication and Authorization, Multi-service Access Control

Infra: AWS, Kubernetes, Docker, PostgreSQL, Redis, Kafka, CI/CD (GitHub Actions)

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
