EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Led a production **multi-agent AI** system on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC** access control.
- Developed and operationalized **AI/ML models** in **Python** with **PyTorch**, **scikit-learn**, and **pandas**, shipping them through **MLOps CI/CD** on **AWS SageMaker**.
- Owned a deployment-gated **evaluation framework** measuring output quality and **hallucination rates** across model versions, blocking failed releases before production.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built and maintained **Apache Airflow** DAGs orchestrating multi-stage **ETL** and data ingestion pipelines on **GCP**, with dependency management and automated failure alerting.
- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set with **hybrid dense-sparse retrieval** and **re-ranking**.
- Cut **p99 latency** from **420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views, partitioning, and lock contention fixes.
- Cut production escalations **60%** in one quarter by standardizing **REST API** contracts and failure handling, driving **root cause analysis**.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval and citation-linked answers via **FastAPI**.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and synthesizes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with **hallucination detection**, regression alerting, a **FastAPI** backend, and **PostgreSQL**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, SQL, PL/SQL, Java, TypeScript, HTML/CSS

AI/ML: PyTorch, scikit-learn, pandas, NumPy, LLMs, RAG, LangGraph, OpenAI Agents SDK, MCP, Model Evaluation

Data Engineering: Apache Airflow, ETL Pipelines, PostgreSQL, Redis, Kafka, FAISS, Pinecone, Data Structures & Algorithms

APIs & Cloud: REST APIs, FastAPI, Microservices, AWS (SageMaker, S3, Lambda), GCP, Docker, Kubernetes, CI/CD

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
