Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Built a multi-agent system in Python and Node.js using LangGraph, the OpenAI Agents SDK, and MCP tool-calling, while driving AI-assisted engineering practices across the team using Claude Code, at 99%+ uptime.
- Built AI chatbot and agent-facing application features with React, integrating agentic backend services through REST APIs for real-time inference at sub-200ms latency.
- Built a deployment-gated evaluation pipeline enforcing automated guardrails around agent outputs, quality, accuracy, and drift, blocking 15% of failed releases before production launch.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.
- Built a model observability framework tracking drift, latency, and evaluation regressions in production agent/model outputs, enabling governance-aligned rollback workflows as an early engineer at this AI startup.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Led standardization of failure-handling contracts (retry, timeout, propagation semantics) across 25+ services in partnership with cross-functional teams through code reviews, reducing production escalations 60% in one quarter.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with Pinecone vector retrieval and hybrid re-ranking decomposes multi-table questions into dependency-ordered SQL subqueries; deployed as an MCP-compatible server for enterprise data queries.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, SQL, C++

Agentic AI & Dev Tools: Agentic AI, Claude Code, GitHub Copilot, AI-Assisted Development, LangGraph, OpenAI Agents SDK, MCP, RAG, Agent Guardrails & Evaluation

Full-Stack & Data: React, Node.js, FastAPI, REST APIs, MongoDB, PostgreSQL, DynamoDB

Cloud & MLOps: AWS (Lambda, EC2, DynamoDB, SageMaker), Azure, GCP (Cloud Run), Docker, Kubernetes, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
