EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Used **Codex** alongside **Claude Code** to accelerate **AI-assisted engineering** productivity across the team.
- Owned end-to-end AI-powered products: designed architecture, built **React/TypeScript** frontend and **Node.js/Python** backend, shipped to production with **GitHub Actions CI/CD**.
- Engineered pluggable **distributed executor** routing pipeline nodes to **Docker** or **AWS Lambda**, backed by **S3** artifact store eliminating redundant recomputation.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions; iterated on **eval results** and production usage data.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **model observability** framework tracking **drift**, latency, and **eval regressions** in production, enabling governance-aligned **rollback** workflows.
- Cut **p99 inference latency 420ms to 140ms** across **50K+ daily requests** migrating synchronous serving to async **vLLM** on **GCP Cloud Run** with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Standardized failure-handling contracts across **25+ financial services**, reducing production escalations **60%** in one quarter via consistent **retry, timeout, and propagation** semantics.
- Standardized API contracts and failure handling across **25+ services**, reducing escalations **60%**; drove **root cause analysis** and **post-incident reviews** to improve long-term reliability.
- Built and operated **25+ production microservices** in **C++** and **SQL**-backed **distributed systems** for **1M+ users**, sustaining **99.9% uptime** over 4 years on **AWS** (EC2, RDS, SQS).

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system diagnosing **production incidents** via tool-use chains; routes alerts to specialized sub-agents and synthesizes **root cause reports**, reducing **MTTR**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production **LLM eval platform** with rubric-based scoring, **drift detection**, and latency tracking across model versions; **FastAPI**, **React/TypeScript**, **PostgreSQL**.

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent decomposes multi-table questions into dependency-ordered **SQL subqueries** with intermediate result passing; deployable as **MCP-compatible** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: TypeScript, JavaScript, Python, Go, Java, SQL, HTML/CSS

Dev Tooling: CI/CD, Build Systems, Test Automation (Jest, Playwright), Code Review Tooling

AI-Assisted Engineering: Codex, Claude Code, Coding Agents, Developer Productivity

Infra: Node.js, Docker, Kubernetes, GitHub Actions, AWS, GCP

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
