Experience

Oracle | *Software Engineer, AI Platform* Jun 2025 – Present

- Built **evaluation-based release gates** for production agents: harnesses scoring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, blocking releases on **regression suites** and **A/B tests**.
- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that plans, calls tools, and acts on results, handling **millions of daily transactions** at **99%+ uptime**.
- Built **containerized backend services** exposing typed **REST APIs** over **Docker** and serverless compute at **sub-200ms p99**, secured with **OAuth/RBAC**, and ran production AI workloads on **Azure** alongside AWS.
- Shipped **SSE-based streaming** agent delivery with **guardrails**, policy controls, and real-time **observability**, cutting redundant API calls **90%**.

QureAI | *AI Engineer* Mar 2026 – Present

- Built an **SRE incident agent** that investigates production alerts, diagnoses root causes, and escalates data questions to a **SQL agent** over **A2A** (agent-to-agent).
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Built **CI/CD** with automated quality gates, failure alerting, and **automated rollback** for safe rollouts, plus **Bedrock Guardrails**.

Nomura Research Institute Financial Technologies | *Software Engineer* Sep 2019 – Aug 2023

- Cut model-related production regressions **28%** and validation time from **6 hours to 90 minutes** by building an automated **evaluation and deployment-gating framework** covering quality, latency, robustness, and regression checks with **rollback criteria**.
- Raised ML service availability to **99.9%** and cut **p99 latency 32%** by building **Python/C++** serving infrastructure with health checks, retry policies, and **automated failure recovery**.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling across **25+ services**, owning **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

Projects

RootCause AI `github.com/ganeshhgupta/rootcause-ai`

- **LangGraph** multi-agent system that triages production alerts, routes each to a specialized sub-agent with guardrailed **tool use**, and writes a structured **root-cause brief**.

Watch-your-LLM `github.com/ganeshhgupta/watch-your-llm`

- **LLM observability** platform that traces model calls, latency, and token usage across versions, with a **FastAPI** backend and **React/TypeScript** dashboard.

Distributed NoSQL Database `github.com/ganeshhgupta/distributed-kv-store`

- **Fault-tolerant** database that confirms writes only after a **majority of nodes** store them, recovers crashed nodes from a **write-ahead log**, and resyncs partitioned replicas via **leader-follower replication**.

Education

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0* Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science* Aug 2016 – Jul 2020

Skills

Languages: Python, Java, C++, TypeScript, SQL

Agentic AI: OpenAI Agents SDK, LangGraph, AutoGen, CrewAI, MCP, A2A, RAG, Claude, GPT, Llama, Gemini

Evaluation and Governance: LLM Evals, Release Gates, Regression Suites, Hallucination Detection, A/B Testing, Guardrails

Cloud and Reliability: Azure, AWS, Docker, Kubernetes, Microservices, CI/CD, Prometheus, Grafana, Incident Response, RCA

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
