EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Led a production **multi-agent system** on **OpenAI Agents SDK**, **LangGraph**, and **MCP** tool use that autonomously processes **financial workflows**, handling **millions of daily transactions** at **99%+ uptime**.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions, gating releases with **regression suites**.
- Worked with customers and cross-functional teams to turn **customer requirements** into shipped **integrations**, taking agent workflows from **prototype to production**.
- Built a **distributed executor** exposing typed **REST APIs** over Docker and serverless compute, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC**.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Raised **top-3 retrieval recall** from **61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.
- Implemented **GraphRAG** on a **Neo4j** knowledge graph for a regulated healthcare product, and agent workflows on **AWS Bedrock**.
- Cut **p99 latency** from **420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production Python and Java microservices** for **1M+ users** in **financial services** at **99.9% uptime** on **AWS**.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Cut production escalations **60%** in one quarter by standardizing API contracts and failure handling, driving **root cause analysis** and post-incident reviews.
- Led **architecture and code reviews** and mentored engineers on system design, reliability, and secure API practices.

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **LangGraph** multi-agent system that routes production alerts to specialized sub-agents via **tool-use** chains and writes structured root-cause reports, cutting **MTTR 65%**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

LangFetch

tinyurl.com/LangFetch

- **LangGraph** agent that decomposes natural-language **financial queries** into dependency-ordered **SQL** subqueries with **Pinecone** retrieval, served via **FastAPI** as an **MCP** server.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: Python, TypeScript, Java, SQL, HTML/CSS

Agents: LangGraph, LangChain, OpenAI Agents SDK, CrewAI, AutoGen, MCP, Tool Calling, Multi-Agent Orchestration, AWS Bedrock

RAG & Evals: Hybrid Retrieval, Re-ranking, GraphRAG, Pinecone, FAISS, Neo4j, Eval Harnesses, Guardrails

Platform: FastAPI, Node.js, React, REST APIs, PostgreSQL, Redis, AWS, GCP, Docker, Kubernetes, CI/CD, Observability

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
