EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned full-stack delivery of backend services and APIs (Java, Python/FastAPI, React/TypeScript), handling millions of daily transactions at 99%+ uptime.
- Built a multi-agent Generative AI system via the OpenAI Agents SDK and MCP tool-use, integrating external APIs and enterprise workflows end to end.
- Replaced polling with SSE for live metrics streaming, building a real-time full-stack data layer and cutting redundant API calls 90%.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Build and deploy Generative AI capabilities for a healthcare AI product, training and evaluating production models (PyTorch) alongside full-stack delivery of AI-powered features.
- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the data pipeline with hybrid dense-sparse retrieval and re-ranking, backed by PostgreSQL and vector storage.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests through an async service redesign supporting a healthcare-facing production workload.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected 25+ production Java Spring Boot microservices exposing REST APIs for financial transaction processing, serving 1M+ users at 99.9% uptime over 4 years on AWS.
- Standardized REST API contracts and failure-handling across 25+ services, reducing production escalations 60% via consistent retry, timeout, and OAuth-aligned authentication patterns.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack agent platform: React dashboard, Node.js/TypeScript backend, PostgreSQL, decomposing natural-language questions into dependency-ordered SQL subqueries via a typed REST API.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack LLM evaluation platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, monitoring quality and regressions across production deployments.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent Generative AI system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Python, TypeScript, SQL, C++

Full-Stack: React, Node.js, FastAPI, Spring Boot, REST APIs, Microservices

Data: PostgreSQL, MongoDB, Redis, SQL, NoSQL

Generative AI: LLMs, OpenAI Agents SDK, MCP, LangGraph, RAG, Prompt Engineering

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
