Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Build production-grade Python services and data pipelines, architecting scalable designs that translate ambiguous business requirements into well-engineered solutions.
- Own CI/CD pipelines, containerized deployment (Docker, Kubernetes), and Terraform infrastructure as code, operating in Linux environments with command-line automation.
- Built a deployment-gated evaluation framework enforcing guardrails and observability, blocking 15% of failed releases before production.
- Design database schemas and query logic for systems processing large-scale datasets with consistency and traceability.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs for large-scale ingestion and transformation feeding downstream pipelines.
- Built custom evaluators tracking drift, latency, and regression across model versions, documenting methodology for review.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.

Projects

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction for fault-tolerant data systems.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting; FastAPI backend, PostgreSQL.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, Go, SQL, C++

Data & Systems: PySpark, Data Pipelines, PostgreSQL, Distributed Systems, Linux

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD

Practices: Production-Grade Python, Documentation, Traceability

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
