EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed and implemented backend services and REST APIs (Python/FastAPI) powering cloud-based distributed workflows handling millions of daily transactions at 99%+ uptime.
- Engineered a pluggable distributed executor routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Replaced polling with SSE for live metrics streaming, cutting redundant API calls 90%; built the React/TypeScript frontend consuming these APIs.
- Participated in design and code reviews enforcing style and testability standards, and triaged production issues affecting distributed service reliability.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built an observability framework tracking latency and reliability regressions across distributed inference services in production.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by migrating synchronous services to an async architecture on GCP Cloud Run with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java and C++ with SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, exposing REST APIs for rubric-based scoring and latency tracking.

LangFetch

tinyurl.com/LangFetch

- Agent decomposing multi-table questions into dependency-ordered SQL subqueries with intermediate result passing, deployable as a standalone API server for enterprise data queries.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, C++, Python, TypeScript, SQL

Distributed Systems: REST APIs, Cloud-Based Distributed Systems, Microservices, Fault-Tolerant Scheduling

Databases: PostgreSQL, SQL/Relational Databases, MongoDB, NoSQL

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda), GCP (Cloud Run), Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
