EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed, developed, debugged, and tested software components for production platform services, delivering assigned features against sprint priorities and release schedules.
- Collaborated across engineering, product, and cross-functional teams to clarify requirements, define interfaces, and align on delivery timelines for platform features.
- Wrote maintainable code following team coding standards; supported code reviews, unit and integration testing, and root-cause analysis for production defects.
- Participated in Agile ceremonies (sprint planning, standups, retrospectives) and contributed to continuous improvement of team development practices.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built an observability and monitoring framework tracking production regressions, supporting release readiness and root-cause analysis across the platform.
- Diagnosed and resolved a production latency regression (420ms to 140ms p99) across 50K+ daily requests through systematic debugging and architectural changes.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and maintained 25+ production software components in Java and C++ for 1M+ users, sustaining 99.9% uptime over 3 years through disciplined testing and release practices.
- Standardized failure-handling and defect-resolution processes across 25+ services, reducing production escalations 60% in one quarter through root-cause analysis and consistent engineering standards.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Designed and tested a Raft-consensus distributed system handling concurrent writes with linearizable reads and log compaction, validated through systematic integration testing.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Built and tested a full-stack platform (FastAPI, React/TypeScript, PostgreSQL) with CI/CD pipelines and automated test coverage for release readiness.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Built a tool automating production incident diagnosis and root cause analysis, reducing manual debugging toil for engineering teams.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, C++, Python, TypeScript, SQL

Practices: Agile/Scrum, SDLC, Debugging & Root-Cause Analysis, Unit & Integration Testing, Code Review

Tools: Git/Version Control, CI/CD, Defect Tracking, Docker, Kubernetes

Cloud: AWS (EC2, S3, RDS, SQS), GCP (Cloud Run)

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
