EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Engineered a pluggable distributed executor routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation at scale.
- Owned a production service end-to-end, from architecture through deployment, monitoring, and on-call, handling millions of daily transactions at 99%+ uptime.
- Deployed a real-time data-serving pipeline on AWS SageMaker achieving sub-200ms p99 latency with RTO under 2 minutes.
- Replaced polling with SSE for live metrics streaming, cutting redundant API calls 90% through telemetry-driven performance engineering.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to an async architecture on GCP Cloud Run with autoscaling.
- Built a model observability framework tracking latency and reliability regressions in production, enabling live-site health monitoring and rollback workflows.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus distributed key-value storage engine handling concurrent writes with linearizable reads and log compaction, a from-scratch study of database internals and consensus.
- Built a companion VPC control plane simulator modeling subnet routing and security group enforcement over the same distributed storage substrate.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, exposing APIs for rubric-based scoring and latency tracking at scale.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, C++, Python, TypeScript, SQL

Distributed Systems: Consensus Protocols (Raft), Database Internals, Concurrency, Fault-Tolerant Scheduling, Cloud Infrastructure

Data Stores: PostgreSQL, SQL/Relational Databases, NoSQL, S3

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
