EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned a storage-backed production service end-to-end, architecture through deployment, on-call, and live-site health, handling millions of daily transactions at 99%+ uptime.
- Engineered a pluggable distributed executor with an S3 artifact store eliminating redundant recomputation, applying cost and performance engineering to a resource-provider-style routing layer.
- Used AI-assisted, agentic development loops (Claude Code, Codex) daily as a force multiplier, reviewing generated code and validating correctness to drive engineering outcomes.
- Deployed a RAG data-retrieval pipeline on AWS SageMaker for agent workloads at sub-200ms p99 latency with RTO under 2 minutes.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built an observability and telemetry framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows for agent-facing services.
- Improved vector retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking over a vector store.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed storage engine handling concurrent writes with linearizable reads and log compaction; companion control plane simulator for subnet routing and policy enforcement.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports, built for agentic live-site response.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Evaluation and inference-pipeline observability platform with rubric-based scoring and drift detection; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, C++, Python, TypeScript, SQL

Distributed Systems: Consensus Protocols, Concurrency, API Design, Resource-Provider Patterns, Object Storage

AI-Assisted Engineering: Agentic Development Loops (Claude Code, Codex), Agent Evaluation & Inference Pipelines, Vector Retrieval

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, SageMaker), GCP (Cloud Run), Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
