EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Architected platform APIs and shared infrastructure (Python, distributed executor, S3 artifact store) adopted across multiple product teams to build, test, and launch AI-powered applications end-to-end.
- Set the evaluation and release-quality bar for the platform by building a deployment-gated framework that blocks failed releases before they reach production, now a standard other teams build on.
- Made build-versus-kill calls on platform capabilities based on production usage data and cost tradeoffs, selecting and tuning which models and services teams standardize on.
- Owned platform reliability end-to-end at 99%+ uptime, handling millions of daily transactions across consuming services.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built the observability and eval infrastructure that other engineering teams rely on to track drift, latency, and regressions before shipping, turning a one-off tool into shared platform infrastructure.
- Improved retrieval recall 61% to 89% on a 2K-query eval set, a change rolled out as a platform-wide default rather than a single-team fix.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users in a high-volume financial transaction environment, sustaining 99.9% uptime over 3 years on AWS.
- Standardized failure-handling contracts across 25+ services company-wide, reducing production escalations 60% in one quarter, a pattern other teams adopted beyond the original project.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production LLM eval and observability platform with rubric-based scoring, drift detection, and regression tracking across model versions; FastAPI backend, React/TypeScript dashboard, PostgreSQL.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Java, C++, TypeScript, SQL

Platform Engineering: Shared Infrastructure Design, API Architecture, Cross-Team Adoption, Release Gating

AI/ML: LLMs, Agentic AI, RAG, Model Evaluation, Observability

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
