EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned **full-stack** products end to end: **React/TypeScript** frontends and **Node.js** backend services over typed **REST APIs**, shipped through **GitHub Actions CI/CD** and handling **millions of daily transactions** at **99%+ uptime**.
- Built **multi-step, failure-tolerant workflows** with per-step **Redis checkpointing** so interrupted runs resume from the last committed step, deployed as containers on **AWS ECS/EKS**.
- Built a **distributed executor** routing work to Docker and serverless compute via typed APIs, backed by an **S3** artifact store at **sub-200ms p99**, with **OAuth/RBAC** for partner access.
- Turned customer requirements into shipped **partner integrations** and owned production reliability with **SSE-based observability** and deployment gates that block regressions.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built backend services for a **regulated healthcare** AI product, including **GraphRAG** on **Neo4j** and agent workflows on **AWS Bedrock**.
- Cut **p99 latency from 420ms to 140ms** across **50K+ daily requests** by moving LLM serving to an **async, autoscaled** architecture.
- Raised **top-3 retrieval recall from 61% to 89%** on a 2K-query eval set by rebuilding the pipeline with **hybrid dense-sparse retrieval** and **re-ranking**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production microservices** processing **financial transactions** for **1M+ users** at **99.9% uptime** on **AWS** (EC2, RDS, SQS, Lambda).
- Cut production escalations **60%** in one quarter by standardizing **retry, timeout, and failure-propagation** contracts across services, driving **root cause analysis**.
- Partnered with **enterprise clients** to design **custom integrations**, translating business processes into technical workflows and reusable integration playbooks.
- Cut nightly batch aggregation from **8 minutes to 90 seconds** by optimizing **SQL and PL/SQL** on a financial RDBMS with indexed views and partitioning.

PROJECTS

LangFetch

tinyurl.com/LangFetch

- Full-stack app with a **TypeScript/Node.js** backend, **React** dashboard, and **PostgreSQL**; a LangGraph agent turns questions into dependency-ordered SQL via a typed **REST API**.

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- Raft**-consensus key-value store with **linearizable reads** and **log compaction**, plus a companion VPC control plane simulator.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, **hallucination detection**, regression alerting, a **FastAPI** backend, and a **React/TypeScript** dashboard.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Aug 2016 – Jul 2020

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML/CSS

Full Stack: Node.js, NestJS, React, Next.js, REST APIs, Microservices, OAuth/RBAC, PostgreSQL, Redis

Infra: AWS (ECS, EKS, EC2, RDS, SQS, Lambda, S3), Terraform, Docker, Kubernetes, GitHub Actions CI/CD, Observability

Fundamentals: Data Structures & Algorithms, Distributed Systems, API and Data Model Design, System Design

Certifications: AWS Certified Developer Associate, GCP Professional MLOps Engineer
