Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Build and maintain Python data pipelines and REST APIs, integrating diverse upstream data sources into unified downstream workflows at 99%+ uptime.
- Own CI/CD pipelines, containerized deployment (Docker, Kubernetes), and Terraform-based infrastructure as code across the platform.
- Built a deployment-gated evaluation framework enforcing data quality guardrails and observability, catching 15% of failed releases before production.
- Partner with cross-functional analytics and business teams to deliver reliable datasets and reporting, working in Agile sprints with Git-based version control.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs for large-scale ingestion, transformation, and validation, feeding downstream analytics and model training pipelines.
- Built automated data-quality monitors tracking drift, latency, and regression across pipeline runs, flagging issues before they reached production.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing REST APIs, serving 1M+ users at 99.9% uptime on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation and ETL, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling and data-integrity contracts across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

LangFetch | tinyurl.com/LangFetch

- Full-stack app with TypeScript/Node.js backend, React dashboard, and PostgreSQL; decomposes natural-language questions into dependency-ordered SQL subqueries via typed REST API.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production eval/monitoring platform with drift tracking, rubric-based scoring, and regression alerting across pipeline versions; FastAPI backend, PostgreSQL.

Distributed KV Store & VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a distributed key-value store in Go/C++ implementing Raft consensus, linearizable reads, and log compaction for fault-tolerant data systems.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, SQL, Java, TypeScript, C++

Data Engineering: PySpark, ETL Pipelines, Kafka, Airflow, PostgreSQL, Redis

Cloud & DevOps: AWS (EC2, RDS, SQS, S3), GCP, Docker, Kubernetes, Terraform, CI/CD

Practices: Data Quality Monitoring, Data Governance, REST APIs, Agile

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
