EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Wrote infrastructure/systems-level code in **Rust** and **Go** for distributed scheduling, resource allocation, and fault-tolerant placement logic under GPU-scarcity constraints, provisioning multi-cloud GPU clusters (**AWS**, **GCP**, CoreWeave).
- Built observability and autoscaling for inference serving via **Prometheus/Grafana**, keeping fleet utilization up through node loss and provider failures while sustaining **99%+ uptime**.
- Engineered a pluggable **distributed executor** routing workloads across **Docker** and **AWS Lambda** with an **S3**-backed artifact store, designing for **fault tolerance** under scale-sensitive failure conditions.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut **p99 latency 420ms to 140ms** across **50K+ daily requests** by redesigning synchronous serving into an **async**, **fault-tolerant** architecture on **GCP Cloud Run** with **autoscaling**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated **25+ production microservices** in **Java** and **C++** on **ECS/EKS** with **DynamoDB** and **Kafka**-based distributed messaging for **1M+ users**, sustaining **99.9% uptime** over 4 years.
- Standardized **failure-handling** contracts across 25+ financial services through **design reviews**, **code review**, and **on-call production support**, reducing production escalations **60%** in one quarter.
- Mentored junior engineers on distributed-systems design and root-cause investigation while redesigning a nightly batch pipeline, cutting runtime from **8 minutes to 90 seconds**.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- **Raft-consensus** distributed storage engine handling concurrent writes with **linearizable reads**, **log compaction**, and **leader election**; companion VPC control plane simulator modeling subnet routing.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **Multi-agent** system automating production incident diagnosis via **tool-use** chains, routing alerts to specialized sub-agents and synthesizing root cause reports for faster investigation.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack observability platform with **FastAPI** backend, **React/TypeScript** dashboard, and **PostgreSQL**, exposing **REST APIs** for scoring and latency tracking at scale.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Rust, Go, C++, Python, TypeScript, SQL

Distributed Systems: Consensus Protocols, Log Compaction, Linearizable Reads, Fault-Tolerant Scheduling, Query & Storage Engines

Observability: Prometheus, Grafana, Monitoring, Alerting, Root Cause Investigation

Cloud & Data: AWS (S3, DynamoDB, ECS, EKS, Lambda, SQS), Kafka, GCP, Docker, Kubernetes

Agile & SDLC: Design, Development, Testing, Code Review, Deployment, On-Call, Mentoring

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
