EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed and built **distributed, event-driven microservices** in **Python** and **Java** on **AWS**, including a pluggable executor routing workloads across **Docker** and **AWS Lambda** with an **S3**-backed artifact store.
- Owned services across their lifecycle with **Prometheus/Grafana** observability, runbooks, and on-call fixes, keeping multi-agent AI workflows at **99%+ uptime** across millions of daily transactions.
- Removed developer-experience bottlenecks with a deployment-gated **CI/CD** evaluation framework and automated regression **testing**, blocking **15%** of failed releases before production.
- Led design reviews and **code reviews**, decomposed complex projects into deliverable milestones, and wrote design docs and service descriptions for partner teams.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Owned **ML infrastructure** end to end, from model deployment to evaluation and debugging, cutting **p99 latency 420ms to 140ms** across **50K+ daily requests**.
- Built and operated **Kubernetes**-based **GPU** infrastructure across clouds, writing **Go** and **Python** tooling for scheduling and fault-tolerant placement.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+ production microservices** in **Java/Spring** for **1M+ users** on **AWS** (EC2, RDS, **SQS** messaging), sustaining **99.9% availability** over four years.
- Shipped **React/TypeScript** front ends on top of those services end to end, from schema design to UI, for financial-services products.
- Standardized failure-handling contracts across services and drove root-cause analysis, cutting production escalations **60%** in one quarter.

PROJECTS

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** distributed key-value store with **linearizable reads**, leader election, and **log compaction**.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent** incident-diagnosis system with **tool-use** chains that collects evidence from logs and metrics and synthesizes root-cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- LLM evaluation** platform with rubric-based scoring, drift detection, and latency tracking across model versions; **FastAPI**, **PostgreSQL**, regression alerting.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Go, Python, TypeScript, SQL, C++

Backend: Event-Driven Microservices, REST APIs, Kafka-style Messaging (SQS), Spring, FastAPI, PostgreSQL, Redis

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, Terraform, Prometheus, Grafana

Frontend: React, TypeScript, HTML, CSS

Fundamentals: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, HTML, CSS

Certifications: AWS Certified Developer Associate, Google Cloud Professional Machine Learning Engineer
