## EXPERIENCE

---

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Developed **large-scale, distributed backend** services in **Go, Java**, and **Python** for **GPU** cluster planning, scheduling, and fault-tolerant placement across **AWS, GCP**, and **CoreWeave**.
- Built **orchestration** infrastructure: a pluggable **distributed executor** routing workloads across **Docker** and **AWS Lambda**, evolving toward a **service-oriented** control plane.
- Led the launch of multi-agent AI features and maintained them in production at **millions of daily transactions** and **99%+ uptime**, working with product teams and users on fixes.
- Built **Prometheus/Grafana** observability and **autoscaling** for **vLLM** inference serving, correlating compute and network telemetry to catch regressions early.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built and operated **Kubernetes**-based **GPU** infrastructure across clouds, writing **Go** and **Python** tooling for scheduling and fault-tolerant placement.
- Owned **ML infrastructure** end to end, from model deployment to evaluation and debugging, cutting **p99 latency 420ms to 140ms** across **50K+ daily requests**.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+ production microservices** in **Java** for **1M+ users** on **AWS** (EC2, RDS, SQS), sustaining **99.9% availability** over four years.
- Shipped **React/TypeScript** front ends end to end on top of those services, from schema design to UI.
- Standardized failure-handling contracts across services and drove root-cause analysis, cutting production escalations **60%** in one quarter.

## PROJECTS

---

Distributed KV Store

[github.com/ganeshhgupta/distributed-kv-store](https://github.com/ganeshhgupta/distributed-kv-store)

- **Raft-consensus** distributed key-value store with **linearizable reads**, leader election, and **log compaction**.

RootCause AI

[github.com/ganeshhgupta/rootcause-ai](https://github.com/ganeshhgupta/rootcause-ai)

- **Multi-agent** incident-diagnosis system with **tool-use** chains that collects evidence from logs and metrics and synthesizes root-cause reports.

Watch-your-LLM

[github.com/ganeshhgupta/watch-your-llm](https://github.com/ganeshhgupta/watch-your-llm)

- **LLM evaluation** platform with rubric-based scoring, drift detection, and latency tracking across model versions; **FastAPI**, **PostgreSQL**, regression alerting.

## EDUCATION

---

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

## SKILLS

---

**Languages:** Java, Go, C++, Python, TypeScript, SQL

**Distributed Systems:** Control Planes, Orchestration, Cluster Scheduling, Fault Tolerance, Raft Consensus

**Cloud & Infra:** AWS, GCP, Kubernetes, Docker, Terraform, Prometheus, Grafana

**Web Stack:** React, TypeScript, REST APIs, PostgreSQL, MongoDB

**Fundamentals:** Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, HTML, CSS

**Certifications:** AWS Certified Developer Associate, Google Cloud Professional Machine Learning Engineer
