EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed **distributed services** in **Go** and **Python** for **GPU capacity** planning, allocation, and placement across cloud providers (**AWS**, **GCP**, **CoreWeave**), regions, and clusters.
- Automated capacity workflows that relied on manual coordination, building **APIs** and tools other teams use to make capacity-aware decisions.
- Built **Prometheus/Grafana** monitoring, utilization reporting, and **SLIs** for GPU fleets, correlating compute and network telemetry.
- Diagnosed complex production issues across schedulers, nodes, and **InfiniBand/RoCE** networks, improving fleet reliability and utilization.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built and operated **Kubernetes**-based **GPU** infrastructure across clouds, writing **Go** and **Python** tooling for scheduling and fault-tolerant placement.
- Owned **ML infrastructure** end to end, from model deployment to evaluation and debugging, cutting **p99 latency 420ms to 140ms** across **50K+** daily requests.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+** production microservices for **1M+** users on **AWS** (EC2, RDS, SQS), sustaining **99.9% uptime** over four years.
- Designed **Oracle PL/SQL** and **SQL** data layers behind financial services, tuning queries and schemas for low-latency reads at production scale.
- Standardized failure-handling contracts across services and drove root-cause analysis, cutting production escalations **60%** in one quarter.

PROJECTS

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- **Raft-consensus** distributed key-value store with **linearizable reads**, leader election, and **log compaction**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- **LLM evaluation** platform with rubric-based scoring, drift detection, and latency tracking across model versions; **FastAPI**, **PostgreSQL**, regression alerting.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- **Multi-agent** incident-diagnosis system with **tool-use** chains that collects evidence from logs and metrics and synthesizes root-cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Go, C++, SQL

Capacity & Infra: GPU Capacity Planning, Allocation, Utilization Analytics, Data Pipelines, APIs

GPU & HPC: GPU Clusters, Slurm, InfiniBand/RoCE, Kubernetes

Cloud & DevOps: AWS, GCP, Kubernetes, Docker, Terraform, CI/CD, Prometheus, Grafana

Fundamentals: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, HTML, CSS

Certifications: AWS Certified Developer Associate, Google Cloud Professional Machine Learning Engineer
