EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Designed **agent infrastructure** (**LangGraph**, **OpenAI Agents SDK**, **MCP**) that lets teams run multi-step workflows safely and reliably at **millions of daily transactions** and **99%+ uptime**.
- Built **event-driven** pipelines with **Kafka** and **Redis checkpointing** so failed steps are visible and recoverable instead of silently lost.
- Built **Python/FastAPI** backend services and a pluggable **distributed executor** routing workloads across **Docker** and **AWS Lambda** with an **S3**-backed artifact store.
- Built **Prometheus/Grafana** observability and **autoscaling** for **vLLM** inference serving, correlating compute and network telemetry to catch regressions early.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Owned **ML infrastructure** end to end, from model deployment to evaluation and debugging, cutting **p99 latency 420ms to 140ms** across **50K+ daily requests**.
- Built and operated **Kubernetes**-based **GPU** infrastructure across clouds, writing **Go** and **Python** tooling for scheduling and fault-tolerant placement.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+ production microservices** for **1M+ users** on **AWS** (EC2, RDS, SQS), sustaining **99.9% uptime** over four years.
- Designed **Oracle PL/SQL** and **SQL** data layers behind financial services, tuning queries and schemas for low-latency reads at production scale.
- Standardized failure-handling contracts across services and drove root-cause analysis, cutting production escalations **60%** in one quarter.

PROJECTS

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent** incident-diagnosis system with **tool-use** chains that collects evidence from logs and metrics and synthesizes root-cause reports.

LangFetch

tinyurl.com/LangFetch

- LangGraph** agent decomposing natural-language questions into dependency-ordered SQL subqueries with hybrid retrieval and re-ranking; deployable as an **MCP** server.

Distributed KV Store

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** distributed key-value store with **linearizable reads**, leader election, and **log compaction**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Go, Java, C++, SQL, TypeScript

Platform: Agent Infrastructure, Event-Driven Pipelines, Kafka, Data Access Layers, PostgreSQL, Redis

Cloud & DevOps: AWS, GCP, Kubernetes, Docker, Terraform, CI/CD, Prometheus, Grafana

AI: LangGraph, MCP, OpenAI Agents SDK, Evaluation

Fundamentals: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, HTML, CSS

Certifications: AWS Certified Developer Associate, Google Cloud Professional Machine Learning Engineer
