Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Built a multi-agent system in Python using the OpenAI Agents SDK, LangGraph, CrewAI, and AutoGen with MCP tool-calling, orchestrating multi-step autonomous workflows for millions of daily transactions at 99%+ uptime.
- Designed stateful agent memory and context management via Redis checkpointing with fallback and escalation handling, so long-running agent workflows resume from the last committed step across distributed, fault-tolerant execution.
- Built a deployment-gated evaluation pipeline with logging, tracing, and monitoring enforcing automated guardrails around agent outputs, quality, accuracy, and drift, blocking 15% of failed releases before production launch.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval over structured and unstructured data.
- Built a model observability framework tracking drift, latency, and evaluation regressions in production agent/model outputs, enabling governance-aligned rollback workflows as an early engineer at this AI startup.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Led standardization of failure-handling contracts (retry, timeout, propagation semantics) across 25+ services in partnership with cross-functional teams through code reviews, reducing production escalations 60% in one quarter.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with Pinecone vector retrieval and hybrid re-ranking decomposes multi-table questions into dependency-ordered SQL subqueries; deployed as an MCP-compatible server for enterprise data queries.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, TypeScript, SQL, Java, C++

Agentic AI & LLM: Agentic AI, Multi-Agent Systems, LangChain, LangGraph, CrewAI, AutoGen, OpenAI Agents SDK, Anthropic Claude, MCP, RAG, Memory & State Management, Agent Guardrails & Evaluation

Full-Stack: React, Node.js, FastAPI, Flask, REST APIs, Microservices, PostgreSQL, Vector Databases (Pinecone, FAISS)

Cloud & MLOps: AWS (Lambda, EC2, RDS, SQS, SageMaker), Azure, GCP (Cloud Run, Vertex AI), Docker, Kubernetes, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
