Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own full-stack agentic AI products end-to-end in Python (LangGraph, OpenAI Agents SDK) with REST APIs and React/TypeScript/Node.js UIs, translating real business workflows into deployed systems.
- Partner directly with customer-facing stakeholders to scope and deliver production AI solutions, quarterbacking technical delivery from onboarding through stable usage.
- Built a deployment-gated evaluation pipeline enforcing quality and observability, blocking 15% of failed releases before reaching customers.
- Own software reliability, testing, and observability via stateful recovery (Redis checkpointing) on multi-tenant AWS, Azure, and GCP infrastructure at sub-200ms latency.
- Ship fast under evolving requirements, mentoring engineers through code reviews and pair programming while translating field insights into platform improvements.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Integrated AWS Bedrock-hosted foundation models, including Claude, into production agentic AI workflows for managed, scalable model access as an early engineer at this AI startup.
- Improved RAG retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices in distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards across the team.

Projects

LangFetch | tinyurl.com/LangFetch

- LangGraph agent compiling natural-language questions into dependency-ordered SQL subqueries with Pinecone vector retrieval and hybrid re-ranking; deployed as an MCP-compatible server for enterprise data queries.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, TypeScript, Java, SQL, C++

Full-Stack: React, Node.js, FastAPI, REST APIs, Microservices, HTML/CSS

AI-Driven Automation: Agentic AI, LangGraph, LangChain, OpenAI Agents SDK, RAG, AI Governance

Cloud & Infra: AWS, GCP, Azure, Docker, Kubernetes, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
