Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own delivery of a multi-agent LLM system (OpenAI Agents SDK, MCP tool-calling) with dialogue management and RAG-based semantic search for grounded responses.
- Drive adoption of agentic software development across the team using Claude Code and MCP tool-calling as core daily tools, defining technical standards for AI-augmented engineering workflows.
- Built an AI evaluation and observability pipeline enforcing automated quality, safety, and drift checks before every release at 99%+ uptime, guarding against unreviewed agent actions reaching production.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built a voice agent as part of the agentic AI product surface, extending conversational interaction beyond text across multiple channels for a regulated healthcare product.
- Diagnosed a user-facing quality gap directly from real usage signals, then owned the fix end-to-end: redesigned RAG retrieval and semantic search, lifting recall 61% to 89% and cutting the complaint pattern from 22% to 6% of sessions.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java microservices exposing REST APIs for 1M+ users in a regulated financial-data environment, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Helped manage the business through live production outages as part of the on-call rotation, standardizing failure-handling contracts across 25+ services and reducing recurring escalations 60% in one quarter.
- Drove a redesign of a nightly batch data pipeline aggregating financial transactions, cutting downstream-blocking processing from 8 minutes to 90 seconds via indexed views and batch partitioning.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Full-stack production platform with rubric-based scoring, drift detection, and per-call latency tracking across model versions; Python/FastAPI backend, React/TypeScript dashboard, PostgreSQL.

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with Pinecone vector retrieval and hybrid re-ranking decomposes multi-table questions into dependency-ordered SQL subqueries; deployable as MCP-compatible server for enterprise data queries.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

NLP & Conversational AI: LLMs, RAG, Semantic Search, Dialogue Management, Voice Agents, Prompt Engineering

Agentic AI & Backend: Claude Code, MCP, OpenAI Agents SDK, LangGraph, FastAPI, Java Microservices, REST APIs

Cloud & Tools: AWS (Lambda, EC2, S3), Docker, Git, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
