EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Wrote infrastructure/systems-level code in Go, Rust, and C++ for scheduling, resource allocation, and fault-tolerant placement logic in a cloud-native microservices architecture.
- Owned backend services and REST APIs (Python/FastAPI) handling millions of daily transactions at 99%+ uptime, with CI/CD automation end-to-end.
- Engineered a pluggable distributed executor routing pipeline nodes to Docker containers, with fault-tolerant scheduling under scarce-capacity constraints.
- Built a deployment-gated evaluation framework enforcing guardrails and quality checks across production outputs, blocking 15% of failed releases before traffic cutover.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.
- Improved data pipeline retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

LangFetch

tinyurl.com/LangFetch

- Agent decomposing multi-table questions into dependency-ordered SQL subqueries with intermediate result passing; deployed as a standalone API server via gRPC-compatible service boundaries.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, exposing REST APIs for rubric-based scoring and latency tracking.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Go, Java, C++, Python, SQL

Microservices & Data Engineering: REST APIs, Microservices Architecture, Distributed Systems, SQL Optimization, Data Pipelines

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL

Reliability: Fault-Tolerant Scheduling, Observability, Automated Evaluation Pipelines

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
