Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own full-stack features end-to-end for an internal AI platform product, from React/TypeScript front end through the REST API and backend services behind it, owning both without a spec or a big team behind me.
- Built agent-facing tooling and a real-time, SSE-based streaming layer surfacing live agent output and cost/quality signals directly to internal users, working data-heavy problems with SQL and PostgreSQL underneath.
- Independently triaged and resolved production issues across UI and backend, and shaped what got built by working directly with stakeholders on ambiguous, evolving requirements.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Diagnosed a user-facing quality gap directly from real usage signals, then owned the fix end-to-end: redesigned the underlying retrieval data model, cutting the complaint pattern from 22% to 6% of sessions.
- As an early engineer with no big engineering org behind me, drove a performance and cost-efficiency fix that cut latency 420ms to 140ms across 50K+ daily requests.

Nomura Research Institute Financial Technologies

Aug 2020 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java microservices exposing REST APIs for 1M+ users in a regulated financial-data environment, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Drove a redesign of a nightly batch data pipeline aggregating financial transactions, cutting downstream-blocking processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams, reducing production escalations 60% in one quarter through code reviews and design write-ups.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Full-stack production platform with rubric-based scoring, drift detection, and per-call latency tracking across model versions; Python/FastAPI backend, React/TypeScript dashboard, PostgreSQL.

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL

Full-Stack: React, TypeScript, REST APIs, Node.js, FastAPI, PostgreSQL, Relational Data Modeling

Agent-Facing & Data Tooling: OpenAI Agents SDK, MCP, LangGraph, SSE (Real-Time Streaming), Data-Heavy Product Development

Tools & Cloud: Git, Docker, CI/CD, AWS (Lambda, EC2, S3), GCP (Cloud Run)

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
