EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Engineered pluggable **distributed executor** routing pipeline nodes to **Docker** or **AWS Lambda**, backed by **S3** artifact store eliminating redundant recomputation.
- Designed stateful recovery via per-node **Redis checkpointing**; interrupted workflows **resume from the last committed step** across **distributed execution**.
- Built observability and **autoscaling** for **vLLM** serving via **Prometheus/Grafana**; ran distributed training via **Slurm** HPC scheduling, keeping utilization up through node loss.
- Built **evaluation harnesses** measuring LLM output quality, safety, **hallucination rates**, and grounding across agent versions; iterated on **eval results** and production usage data.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built **model observability** framework tracking **drift**, latency, and **eval regressions** in production, enabling governance-aligned **rollback** workflows.
- Built **PySpark** jobs for large-scale feature and dataset preparation feeding downstream **model training** and **evaluation** pipelines.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated **25+ production microservices** in **C++** and **SQL**-backed **distributed systems** for **1M+ users**, sustaining **99.9% uptime** over 4 years on **AWS** (EC2, RDS, SQS).
- Standardized failure-handling contracts across **25+ financial services**, reducing production escalations **60%** in one quarter via consistent **retry, timeout, and propagation** semantics.
- Designed high-throughput **SQL pipelines** and **distributed messaging** workflows on **AWS SQS**, cutting nightly batch aggregation from **8 minutes to 90 seconds** via indexed views and partitioning.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus** KV store with **linearizable reads** and **log compaction**; companion **VPC control plane** simulator modeling subnet routing and security groups.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- LangGraph** multi-agent system diagnosing **production incidents** via tool-use chains; routes alerts to specialized sub-agents and synthesizes **root cause reports**, reducing **MTTR**.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Production **LLM eval platform** with rubric-based scoring, **drift detection**, and latency tracking across model versions; **FastAPI**, **React/TypeScript**, **PostgreSQL**.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Python, Go, C++, Java, SQL, TypeScript, HTML/CSS

ML Platform: Feature Pipelines, Model Training and Serving Infra, PyTorch, Distributed Systems

Data and Orchestration: Airflow, PySpark, AWS (EC2, RDS, SQS, SageMaker), Prometheus/Grafana

Practices: System Design, Data Structures and Algorithms, Observability, On-call

CERTIFICATIONS

AWS Certified Developer Associate | GCP Professional MLOps Engineer
