## Experience

---

### Oracle

Jun 2025 – Present

*Software Engineer, AI Platform*

- Champion AI-assisted engineering across the team, using Claude Code, GitHub Copilot, and MCP tool-calling daily to accelerate coding, testing, debugging, and code review on production services.
- Designed a production multi-agent system (LangGraph, OpenAI Agents SDK) with planning, tool-use, and memory layers, and RAG/grounding pipelines with an LLM evaluation gateway enforcing compliance and drift checks at 99%+ uptime.
- Architected cloud-native infrastructure on AWS and Azure (Lambda, S3, DynamoDB) with Kubernetes and Docker, and built event-driven pipelines on Kafka for distributed, high-concurrency workloads.

### QureAI (AI Startup)

Jan 2024 – May 2025

*ML Infrastructure Engineer*

- Led migration of synchronous PyTorch-backed model serving to async vLLM and TensorRT-LLM with autoscaling as an early engineer at this AI startup, cutting p99 inference latency 420ms to 140ms across 50K+ daily requests.
- Diagnosed a production RAG retrieval gap from real usage signals and owned the fix end-to-end using AWS Bedrock-hosted foundation models, lifting recall 61% to 89% and cutting the complaint pattern from 22% to 6% of sessions.

### Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

*Software Engineer*

- Architected and operated 25+ production Java Spring Boot microservices exposing REST APIs for financial transaction processing at 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams through code reviews and design write-ups, reducing production escalations 60% in one quarter.
- Drove a redesign of nightly financial data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning; mentored engineers on distributed system design patterns.

## Projects

---

### RootCause AI | [github.com/ganeshhgupta/rootcause-ai](https://github.com/ganeshhgupta/rootcause-ai)

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

### Distributed KV Store | [github.com/ganeshhgupta/distributed-kv-store](https://github.com/ganeshhgupta/distributed-kv-store)

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction for fault-tolerant distributed coordination.

## Education

---

### University of Texas at Arlington

Aug 2023 – May 2025

*MS, Computer Science, GPA 4.0/4.0*

### MCKV Institute of Engineering

Jul 2016 – Jul 2020

*BTech, Computer Science*

## Skills

---

**Languages:** Java, Python, TypeScript, JavaScript, SQL

**Java & Backend:** Spring Boot, Spring MVC, REST APIs, Microservices, Distributed Systems, FastAPI, Node.js

**Agentic AI & GenAI:** Agentic AI, RAG, Prompt Engineering, LangGraph, LangChain, OpenAI Agents SDK, AWS Bedrock, MCP, Claude Code

**Cloud & Infra:** AWS (EC2, Lambda, S3, RDS, SQS), Azure, Kubernetes, Docker, Kafka, CI/CD

## Certifications

---

AWS Certified Developer Associate | GCP Professional MLOps Engineer
