Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Champion AI-assisted engineering across the team, using Claude Code, GitHub Copilot, and MCP tool-calling daily to accelerate coding, testing, debugging, and code review on production services.
- Designed a production multi-agent system (LangGraph, OpenAI Agents SDK) with planning, tool-use, and memory layers, and RAG/grounding pipelines with an LLM evaluation gateway enforcing compliance and drift checks at 99%+ uptime.
- Architected cloud-native infrastructure on AWS and GCP (Lambda, S3, DynamoDB, Cloud Run) with Kubernetes and Docker, and built event-driven pipelines on Kafka for distributed, high-concurrency workloads.

QureAI (AI Startup)

Jan 2024 – May 2025

ML Infrastructure Engineer

- Led migration of synchronous PyTorch-backed model serving to async vLLM with autoscaling as an early engineer at this AI startup, cutting p99 inference latency 420ms to 140ms across 50K+ daily requests.
- Diagnosed a production RAG retrieval gap from real usage signals and owned the fix end-to-end, lifting recall 61% to 89% and cutting the complaint pattern from 22% to 6% of sessions.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java Spring Boot microservices exposing REST APIs for financial transaction processing at 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams through code reviews and design write-ups, reducing production escalations 60% in one quarter.
- Drove a redesign of nightly financial data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views and batch partitioning; mentored engineers on distributed system design patterns.

Projects

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Distributed KV Store | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction for fault-tolerant distributed coordination.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Java & Backend: Spring Boot, Spring MVC, REST APIs, Microservices, Distributed Systems, FastAPI, Node.js

AI-Assisted SDLC & Agentic AI: Claude Code, GitHub Copilot, RAG, LangGraph, LangChain, OpenAI Agents SDK, MCP, Prompt Engineering

Cloud & Infra: AWS (EC2, Lambda, S3, RDS, SQS), GCP (Cloud Run), Kubernetes, Docker, Kafka, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
