Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Lead an agentic AI initiative automating platform engineering workflows (LangGraph, CrewAI, AutoGen, OpenAI Agents SDK) with RAG architectures, MCP, and vector-based retrieval.
- Build data platform capabilities with embedded governance and quality checks, partnering with product and analytics teams to deliver production-grade solutions.
- Built a deployment-gated evaluation framework enforcing guardrails and data quality validation, blocking 15% of failed releases before rollout.
- Own CI/CD and containerized deployment (Docker/Kubernetes) with Terraform-based infrastructure as code across the platform.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs and pipelines for large-scale feature/dataset preparation feeding downstream model training and evaluation.
- Built custom evaluators tracking drift, latency, and regression across model versions, catching failures before they reached production.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data pipeline aggregation, cutting processing from 8 minutes to 90 seconds via indexed views, dimensional modeling, and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

LangFetch | tinyurl.com/LangFetch

- LangGraph agent with MCP-compatible tool-use compiling natural-language questions into dependency-ordered SQL subqueries with vector retrieval and hybrid re-ranking; TypeScript/Node.js backend, PostgreSQL.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- LangGraph multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, Java, SQL, TypeScript, C++

Data Engineering: PySpark, ETL/Data Pipelines, Data Modeling, Data Quality/Governance, PostgreSQL, Redis

Agentic AI & GenAI: LangGraph, CrewAI, AutoGen, OpenAI Agents SDK, RAG, MCP, Vector Databases

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
