Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Use Claude Code daily as an agent-based development workflow to accelerate implementation, improve automated test coverage, and support debugging and root-cause analysis, within team guardrails for agentic AI in the SDLC.
- Design, build, and maintain full-stack features (React/TypeScript frontend, Python backend) from technical design through production deployment, partnering with Product and QA.
- Contribute to CI/CD, testing, and observability improvements, working within a microservices/distributed systems architecture on AWS.
- Participate in design and code reviews, applying sound judgment when reviewing AI-generated output for correctness and maintainability.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built custom evaluators for RAG/agent workflows tracking drift, latency, and regression across model versions, catching failures before they reached production.
- Improved semantic retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the chunking pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected 25+ production Java Spring Boot microservices exposing RESTful services, serving 1M+ users at 99.9% uptime on AWS (Lambda, DynamoDB, RDS, S3).
- Built full-stack features integrating PostgreSQL and other relational databases with distributed backend services, following object-oriented design principles.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, participating in Agile ceremonies and driving consistent engineering standards.

Projects

LangFetch | tinyurl.com/LangFetch

- Full-stack app with TypeScript/Node.js backend, React dashboard, and PostgreSQL; agent decomposes natural-language questions into dependency-ordered SQL subqueries via typed REST API.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production LLM eval platform with hallucination detection, drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, Python, TypeScript, SQL, C++

Backend & APIs: Spring Boot, REST APIs, Microservices, Distributed Systems, JUnit, Mockito

Agentic Coding & Frontend: Claude Code, Codex, React, TypeScript, HTML/CSS

Data & Cloud: PostgreSQL, AWS (Lambda, DynamoDB, RDS, S3), Git, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
