Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own production Python services powering a multi-agent platform (OpenAI Agents SDK, MCP tool-calling) on Azure and AWS, applying agentic coding practices (Claude Code, AI-assisted code review) to accelerate delivery across the team.
- Built an AI evaluation and observability pipeline establishing measurement and monitoring for AI-assisted components: automated quality, safety, and drift checks before every release, blocking 15% of releases that failed validation.
- Added human-in-the-loop review gates and a deployment-gated CI/CD release process guarding against unreviewed agent actions reaching production, and mentor engineers through design and code reviews at 99%+ uptime.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Diagnosed a user-facing quality gap directly from real usage signals, then owned the fix end-to-end: redesigned RAG retrieval, lifting recall 61% to 89% and cutting the complaint pattern from 22% to 6% of sessions.
- Led migration of synchronous model serving to async vLLM with autoscaling as an early engineer at this startup, cutting p99 inference latency 420ms to 140ms across 50K+ daily requests.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java microservices exposing REST APIs for 1M+ users in a regulated financial-data environment, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Helped manage the business through live production outages as part of the on-call rotation, standardizing failure-handling contracts across 25+ services and reducing recurring escalations 60% in one quarter.
- Drove a redesign of a nightly batch data pipeline aggregating financial transactions, cutting downstream-blocking processing from 8 minutes to 90 seconds via indexed views and batch partitioning.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Full-stack production platform with rubric-based scoring, drift detection, and per-call latency tracking across model versions; Python/FastAPI backend, React/TypeScript dashboard, PostgreSQL.

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Java, JavaScript, TypeScript, Python, SQL

Agentic AI & AI-Assisted Engineering: Claude Code, MCP, OpenAI Agents SDK, LangGraph, LangChain, RAG, AI Evaluation & Observability, Human-in-the-Loop Workflows

Backend & Distributed Systems: FastAPI, Node.js, Java Microservices, REST APIs, Distributed Systems, PostgreSQL

Cloud & Infra: Azure, AWS (Lambda, EC2, S3), Docker, Kubernetes, CI/CD

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
