Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Own user-facing product features end-to-end, from requirements through shipped code: designed and built the React/TypeScript front end and the REST API/backend powering it as a single feature, not separate handoffs.
- Built a real-time, streaming product experience surfacing live output directly to end users, collaborating with product and design to turn ambiguous requirements into a responsive, production-quality interface.
- Moved fast in a small team: independently triaged and resolved UI and backend issues, shipped features from prototype to production, and kept the product stable through monitoring built in from day one.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Diagnosed a user-facing product gap directly from real usage signals, then owned the fix end-to-end: redesigned the underlying retrieval experience, cutting the complaint pattern from 22% to 6% of sessions.
- As an early engineer at this startup, drove a product-facing performance fix that cut response latency 420ms to 140ms across 50K+ daily requests, directly improving user-perceived speed.

Nomura Research Institute Financial Technologies

Aug 2020 – Aug 2023

Software Engineer

- Architected and operated 25+ production Java microservices exposing REST APIs for 1M+ users in a regulated financial-data environment, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Drove a redesign of a nightly batch data pipeline aggregating financial transactions, cutting downstream-blocking processing from 8 minutes to 90 seconds via indexed views and batch partitioning.
- Led standardization of failure-handling contracts across 25+ services in partnership with cross-functional teams, reducing production escalations 60% in one quarter through code reviews and design write-ups.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Full-stack production platform with rubric-based scoring, drift detection, and per-call latency tracking across model versions; Python/FastAPI backend, React/TypeScript dashboard, PostgreSQL.

Distributed KV Store / VPC Control Plane Simulator | github.com/ganeshhgupta/distributed-kv-store

- Built a Raft-consensus key-value store with leader election, log replication, and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement for fault-tolerant distributed coordination.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL

Product Engineering: React, TypeScript, Responsive UI, End-to-End Feature Ownership, Rapid Prototyping

Backend & APIs: FastAPI, Node.js, REST APIs, JSON, OAuth, Microservices, Real-Time Streaming

Tools & Cloud: Git, Docker, CI/CD, AWS (Lambda, EC2, S3), GCP (Cloud Run)

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
