EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Owned backend services and RESTful APIs (Python/FastAPI) alongside a React/TypeScript frontend, handling millions of daily transactions at 99%+ uptime.
- Used generative AI (LLMs, agentic workflows) to improve development efficiency, building a multi-agent system with the OpenAI Agents SDK and MCP tool-use for production workflows.
- Replaced polling with SSE for live metrics streaming, cutting redundant API calls 90%.
- Participated in design and code reviews enforcing style and testability standards, and triaged production issues affecting service reliability.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by migrating synchronous services to async with autoscaling.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java and SQL-backed distributed systems for 1M+ users in a regulated financial environment, sustaining 99.9% uptime over 3 years on AWS (EC2, RDS, SQS).
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.

PROJECTS

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform (FastAPI backend, React/TypeScript dashboard, PostgreSQL) exposing REST APIs for rubric-based scoring and latency tracking across model versions.

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++, SQL

Frontend & Backend: React, FastAPI, REST APIs, Microservices

AI: Generative AI, LLMs, Agentic AI, OpenAI Agents SDK, MCP

Data: PostgreSQL, SQL/Relational Databases, MongoDB, NoSQL

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda), GCP (Cloud Run), Git, Docker, Kubernetes, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
