## EXPERIENCE

---

### Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Developed and operationalized AI/ML models using PyTorch, TensorFlow, and C++ with automated training workflows across millions of daily transactions, building deep familiarity with framework-level performance characteristics.
- Built a deployment-gated evaluation and test platform used across the engineering team, with rubric-based benchmarking that blocked 15% of regressions before release.
- Engineered a pluggable distributed executor exposing typed REST APIs, routing pipeline nodes across Docker and AWS Lambda, backed by an S3 artifact store eliminating redundant recomputation.
- Drove design and code reviews enforcing style and testability standards, and debugged production issues across services running on Linux (AWS EC2) infrastructure.

### QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Diagnosed and resolved inference-serving bottlenecks, cutting p99 latency 420ms to 140ms across 50K+ daily requests by migrating synchronous serving to async vLLM on GCP Cloud Run.
- Built a model observability framework tracking drift, latency, and eval regressions in production, enabling governance-aligned rollback workflows.

### Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production microservices in Java, C++, and SQL-backed distributed systems for 1M+ users, sustaining 99.9% uptime over 3 years on Linux-based AWS infrastructure (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.
- Cut nightly financial data aggregation blocking downstream settlement from 8 minutes to 90 seconds by redesigning SQL with indexed views and batch partitioning.

## PROJECTS

---

### Distributed KV Store / VPC Control Plane Simulator

[github.com/ganeshhgupta/distributed-kv-store](https://github.com/ganeshhgupta/distributed-kv-store)

- Raft-consensus distributed KV store handling concurrent writes with linearizable reads and log compaction; companion VPC control plane simulator modeling subnet routing and security group enforcement.

### RootCause AI

[github.com/ganeshhgupta/rootcause-ai](https://github.com/ganeshhgupta/rootcause-ai)

- Multi-agent system automating root-cause diagnosis of production failures via tool-use chains across distributed services, reducing manual debugging toil.

### Watch-your-LLM

[github.com/ganeshhgupta/watch-your-llm](https://github.com/ganeshhgupta/watch-your-llm)

- Production eval/test platform with rubric-based scoring, drift detection, and latency tracking across model versions; FastAPI backend, PostgreSQL.

## EDUCATION

---

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

## SKILLS

---

**Languages:** C++, Java, Python, SQL, TypeScript

**Systems:** Linux/Unix Production Services, Distributed Systems, Fault Tolerance, Debugging

**Cloud & Infra:** AWS (EC2, RDS, SQS, Lambda, S3), Docker, Kubernetes, REST APIs

## CERTIFICATIONS

---

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
