Experience

Oracle

Jun 2025 – Present

Software Engineer, AI Platform

- Built a deployment-gated evaluation pipeline tracking model quality, drift, and regression across versions, enforcing guardrails before production release, blocking 15% of failed releases.
- Own end-to-end ML/agent workflows combining feature engineering, retrieval, and model outputs into production-ready pipelines with monitoring and observability at 99%+ uptime.
- Deploy models and data pipelines to production with automated CI/CD, partnering with data and product stakeholders to productionize features end-to-end.
- Write, test, and maintain production-quality Python services, working in Agile sprints with Git-based version control.

QureAI (AI Startup)

Mar 2026 – Present

ML Infrastructure Engineer

- Built PySpark data processing jobs for large-scale feature/dataset preparation feeding downstream model training and evaluation pipelines.
- Developed deep learning models (PyTorch, scikit-learn) with domain-specific architectures, running hands-on model training/fine-tuning on multi-GPU clusters with compression and quantization.
- Built custom evaluators tracking drift, latency, and regression across model versions, catching failures and performance degradation before they reached production.

Nomura Research Institute Financial Technologies

Sep 2019 – Aug 2023

Software Engineer

- Architected and operated 25+ production C++ and SQL-backed microservices for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Drove a redesign of nightly data aggregation, cutting processing from 8 minutes to 90 seconds via indexed views, window functions, and batch partitioning.
- Standardized failure-handling contracts (retry, timeout, propagation semantics) across 25+ services, reducing production escalations 60% in one quarter.
- Mentored engineers through code reviews and design write-ups, driving consistent engineering standards.

Projects

Watch-your-LLM | github.com/ganeshhgupta/watch-your-llm

- Production ML/LLM evaluation platform with drift tracking, rubric-based scoring, and regression alerting across model versions; FastAPI backend, PostgreSQL.

LangFetch | tinyurl.com/LangFetch

- Agent compiling natural-language questions into dependency-ordered SQL subqueries with vector retrieval and hybrid re-ranking; TypeScript/Node.js backend, PostgreSQL.

RootCause AI | github.com/ganeshhgupta/rootcause-ai

- Multi-agent system diagnosing production incidents via tool-use chains; routes alerts to specialized sub-agents and synthesizes evidence-backed root cause reports, reducing mean time to resolution.

Education

University of Texas at Arlington

Aug 2023 – May 2025

MS, Computer Science, GPA 4.0/4.0

MCKV Institute of Engineering

Jul 2016 – Jul 2020

BTech, Computer Science

Skills

Languages: Python, SQL, Java, C++

Data & ML Engineering: PySpark, Spark SQL, scikit-learn, PyTorch, pandas, NumPy, Feature Engineering

MLOps & Evaluation: Model Evaluation, Drift Detection, Model Versioning, CI/CD, Guardrails, Observability

Cloud & Platform: AWS (SageMaker, Lambda, EC2), Azure, Docker, PostgreSQL

Certifications

AWS Certified Developer Associate | GCP Professional MLOps Engineer
