EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Provisioned and operated a large-scale multi-cloud GPU network fabric (AWS, GCP, CoreWeave) with InfiniBand/RoCE transport, tuning routing and congestion behavior for thousands of concurrent training and inference flows.
- Wrote systems-level infrastructure code in Go, Rust, and C++ for scheduling, resource placement, and fault-tolerant failover logic under node loss and provider-level network disruption.
- Owned production network and compute infrastructure end-to-end, architecture through deployment, monitoring, and on-call, sustaining 99%+ uptime across millions of daily transactions.
- Developed and automated test suites integrated into CI/CD pipelines to validate infrastructure changes before production rollout.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Debugged intermittent, scale-sensitive failures across a distributed serving fleet, isolating root cause through systems-level tracing rather than application logs alone.
- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests via an async serving redesign and transport-layer performance tuning.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Built and operated 25+ production C++ and Java distributed systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ services, reducing production escalations 60% via consistent retry, timeout, and propagation semantics.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- C++ Raft-consensus storage engine with linearizable reads and log compaction; companion control plane simulator modeling subnet routing and traffic forwarding decisions across nodes.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack platform with FastAPI backend and PostgreSQL, with automated test suites wired into CI/CD for regression detection before deploy.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis, routing alerts through tool-use chains to isolate system-level failures across distributed services.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: C++, Go, Rust, Python, Java

Networking & Distributed Systems: InfiniBand/RoCE, Large-Scale Network Fabric Operations, Distributed Consensus, Control-Plane/Subnet Routing Simulation, Fault-Tolerant Failover

Infra: Multi-Cloud (AWS, GCP, CoreWeave), Docker, Kubernetes, Production On-Call, High-Availability Systems

DevOps: CI/CD, Automated Test Suites, Systems-Level Debugging

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
