EXPERIENCE

Oracle | *Software Engineer, AI Platform*

Jun 2025 – Present

- Architected distributed platform services handling millions of daily transactions at 99%+ uptime in a large-scale cloud computing environment.
- Engineered a pluggable distributed executor routing workloads across Docker and AWS Lambda with an S3-backed artifact store, designing for fault tolerance under scale-sensitive failure conditions.
- Owned full-stack delivery end-to-end, React/TypeScript frontend through Python/FastAPI backend, shipping in agile weekly cycles.
- Partnered with cross-functional model and platform teams to turn ambiguous, broadly defined problems into shipped production systems.

QureAI | *ML Infrastructure Engineer*

Mar 2026 – Present

- Cut p99 serving latency 420ms to 140ms across 50K+ daily requests by redesigning synchronous serving into an async, fault-tolerant architecture on GCP Cloud Run with autoscaling.
- Improved retrieval recall 61% to 89% on a 2K-query eval set by rebuilding the indexing and query pipeline with hybrid dense-sparse retrieval and re-ranking.

Nomura Research Institute Financial Technologies | *Software Engineer*

Sep 2019 – Aug 2023

- Architected and operated 25+ production microservices in Java, C++, and SQL-backed distributed storage systems for 1M+ users, sustaining 99.9% uptime over 4 years on AWS (EC2, RDS, SQS).
- Standardized failure-handling contracts across 25+ financial services, reducing production escalations 60% in one quarter via consistent retry, timeout, and propagation semantics.
- Redesigned a nightly batch data processing pipeline, cutting runtime from 8 minutes to 90 seconds, and mentored junior engineers on distributed-systems design through full SDLC.

PROJECTS

Distributed KV Store / VPC Control Plane Simulator

github.com/ganeshhgupta/distributed-kv-store

- Raft-consensus distributed storage engine handling concurrent writes with linearizable reads, log compaction, and leader election; companion VPC control plane simulator modeling subnet routing.

RootCause AI

github.com/ganeshhgupta/rootcause-ai

- Multi-agent system automating production incident diagnosis via tool-use chains; routes alerts to specialized sub-agents and synthesizes root cause reports.

Watch-your-LLM

github.com/ganeshhgupta/watch-your-llm

- Full-stack eval and observability platform with FastAPI backend, React/TypeScript dashboard, and PostgreSQL, exposing REST APIs for scoring and latency tracking at scale.

EDUCATION

University of Texas at Arlington | *M.S. Computer Science, GPA 4.0/4.0*

Aug 2023 – May 2025

MCKV Institute of Engineering | *B.Tech Computer Science*

Jul 2016 – Jul 2020

SKILLS

Languages: Java, C++, Python, TypeScript, SQL

Distributed Systems: Scalability, Fault Tolerance, Consensus Protocols, Indexing & Query Systems, Large-Scale Storage

System Design: Architecture, Agile/Full SDLC, Code & Design Review

Cloud & Data: AWS (EC2, RDS, SQS, S3, Lambda), GCP, Docker, Kubernetes, PostgreSQL, CI/CD

CERTIFICATIONS

AWS Certified Developer Associate | Google Cloud Professional Machine Learning Engineer
